Freight

Trusted to deliver on time and in temperature

Temperature controlled transport for the pharmaceutical and bioscience industries

- Same-day and next-day delivery across Europe
- GDP compliant
- Door-to-door cold chain control (-30°C to +29°C)
- 24/7 temperature and location tracking

First for pharma & bioscience

For over a decade, pharma and bioscience professionals have trusted us to deliver peace-of-mind when transporting temperature-sensitive items across the UK and Europe by road.

Everything we do, from our tech innovation, route validation and vehicle maintenance to our driver training and security measures ensures that your goods arrive on time and in temperature, in a safe, compliant way.

- Clinical trial supplies
- Medicines and controlled drugs
- GDP compliant
- ADR certified for hazardous materials
- 100% validated routes
- Comprehensive driver training
- 24/7 customer support

Why go by road?

For many clients we provide a cost-effective, more rapid alternative to air freight.

With us, your goods will be transported in dedicated, sealed vehicles, ensuring secure, door-to-door temperature control and consistent tracking data.

How we can help

Your temperature-sensitive goods will be handled by fully-trained drivers, who bring expertise and a professional attitude to every job.

Real-time tracking

Track location and temperature with 24/7 access to our online customer portal

Temperature control

Use the latest technology to protect your cold chain (-30°C to +29°C).

Time-critical delivery

Guaranteed same-day or next-day delivery in the UK and across Europe.

Dual temperatures

Ship goods at different temperatures in dual compartment vehicles.

Customs advice

Use our customs partners and expertise to achieve smooth border-crossings.

Shipping documentation

Use the latest technology to protect your cold chain (-30°C to +29°C).

Data capture and storage

Delivery data is securely stored for 10 years.

Audit support

We welcome audits to verify our compliance and quality systems.

Compliance & quality

We handle temperature-sensitive goods in accordance with the good distribution practice (GDP) guidelines, defined by the MHRA and the European Medicines Agency.

All our services carefully planned, validated and monitored to meet strict quality standards and our drivers receive regular training, to ensure they follow clear standard operating procedures.

Delivering peace-of-mind

All our services are supported by a 24/7 customer service team, available 365 days a year to respond rapidly to any queries you may have.

If we do encounter a problem, we have full emergency breakdown cover for our vehicles and on-board technology. This is supported by round-the-clock managers, who monitor the safety and progress of all deliveries.

Contact us

Whether you'd like to ship a few vials or multiple pallets, let us take the headache out of logistics for your team, with a service you can rely on.
